

# VAT Registrations and Returns

Accordance offers comprehensive support to companies with cross-border registration and return obligations. We've had years of experience dealing with tax authorities all over the world. What's more, our unique company structure means you'll only ever have to be in contact with one office – here in the UK.

## VAT Compliance

VAT compliance is an awkward and expensive problem for many businesses.

The burden of VAT regulation is growing – as is the risk of fines, penalties and poor corporate governance profiles. As many firms move into new territories, the complexity of handling VAT is increasing at a faster rate.

If your business activities cut across different countries, where should you be registered, how often should you be filing returns, and in what format should the returns be? Could there be an easier way of handling VAT compliance?
